

HIV Health Testing and Counselling (HTC)

HIV COUNSELING AND TESTING PROVIDES ACCESS TO TREATMENT, CARE AND SUPPORT, AND POSITIVE LIVING.

Should I get TESTED?!!

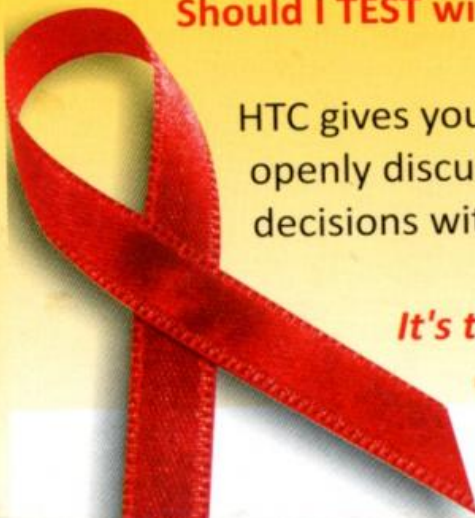

KNOWING your HIV status helps you make informed decisions for the future.

KNOWING you are HIV positive before you get sick often helps you to live longer.

KNOWING you are HIV positive will help you track your health better, treat opportunistic infections quickly, and get support.

KNOWING your HIV status will help you protect yourself and others.

Should I TEST with my PARTNER?!!

HTC gives you and your partner an opportunity to openly discuss your past and present sexual decisions with a trained counsellor.

It's the ONLY WAY TO BE CERTAIN of your own and your partner's HIV STATUS
